
Gamma

The practical Door Operator, simple to mount

The particularly durable, mechanical components convinces by their high endurance. The Gamma is delivered packaged as a kit which is very practical and therefore excellent for do-it-yourself installation. Pre-mounted components allow uncomplicated and rapid assembly. Our optimal solution for light doors used in private areas.

Gamma

Functions Highlights

- integral radio using a frequency of 433.92 MHz with fixed code encryption
- 10W/12V illumination
- reduces complexity of assembly due to pre-mounted components
- commissioning using a simple program sequence
- soft-start/ soft-stop function
- integral emergency release system

Range of application

- for 1 parking space
- for sectional and overhead doors
- for up to 12 m² of gate area*
- up to a door leaf weight of 90 kg*

* dependent on the performance of the device

Clearly laid out connections

Drive chain and chain wheel made from steel

Hand-held transmitter with 4 channels
